Narrative Explanation, if needed

Annual inspection performed today. I arrived on site at 11am, & Maddie accompanied me today. Housing areas are clean, I noted a slight odor in the cat room. Previous inspection was performed on 2-7-17, that inspection noted inadequacies to 2x daily waste removal, Light gravel, and better cleaning needed of building & grounds (debris, junk and accumulation of hair seen).

Today's inspection is detailed on attached narrative.

### Narrative Explanation, continued

#### Today's inspection:

0203- Outdoor ground surfaces are not adequate today, due to light gravel (bare dirt is seen). Outdoor ground surfaces should be at a depth of 6" <sup>of gravel</sup> or greater & maintained.

0207- Building and grounds are not adequate for being kept clean and free from accumulation of debris. I viewed a covered pile of equipment outdoors, that has an accumulation of hair around it. Also while inspecting the outdoor perimeter, I viewed hair and some feces around the kennel and walkways. Waste should be removed from all areas 2x a day; better attention is needed for deep cleaning & removal of hair & cobwebs on a regular basis.

#### 0102- Records are not adequate for the following reasons:

\* During this inspection I noted cage cards <sup>on</sup> are kennels from this kennel's software system Kennel Connections. This software prints out the cage card with the owner information, animal description, vaccine history, medical notes, etc. 7 of the dogs boarded here did not have adequate information (mainly vaccination history) on their cage card: Odin, Royal, Kafka/Veronica, & Bucky/Lucky/Pipkins. When I asked the staff about the missing vaccination history, I was told it was likely just overlooked from being put in the system & they should have a paper copy in the office. After the staff spent several minutes attempting to go through unorganized paper files they were unable to locate those records.

### Narrative Explanation, continued

Shannon & Maddie did attempt to call the vets on file for each of these animals.

> Odin's vet was able to fax his records.

>Kafka & Veronica- staff were able to locate a paper copy of their records

>Bucky, Lucky & Pipkins- staff called two different vets, neither of which had a recent history of seeing these dogs, nor up to date vaccination records.

>Royal- staff contacted Royals owner whom told them that they used a vet in Savannah GA, but could not remember which vet they used. Also staff state that Royal left earlier today, however no signature upon exit is available for Royal.

\* Records are not sufficient to the AWA Regulations. Records are not available for appropriate vaccinations, they are not easily accessible, and signature upon exit is not being collected with every animal that leaves their care.

This inspection is disapproved today, due to the multiple areas noted here. I will return in 30 days, at which time I expect to see records update, organized and easily accessible; gravel added to outdoor yards & a cleaner perimeter around the kennel.

Animals housed here appear healthy, happy & well cared for.
